Overview of Tenured Managers Learning Journey

Masterclass	Title & Theme	Key Focus Areas	Learning Outcomes
Masterclass 1 : Manage Self	Leading with Awareness: Applying Emotional Intelligence and Motivation for Personal Effectiveness	• Understanding and applying Emotional Intelligence (EI) • Managing emotions and triggers effectively • Exploring personal drivers through motivation theories • Strengthening adaptability and self-leadership	• Enhanced self-awareness and emotional control • Ability to stay motivated and focused under pressure • Greater personal effectiveness and resilience
Masterclass 2 : Managing Teams	Managing Teams: Enhancing Collaboration, Adaptability & Feedback for High Performance	• Understanding team development stages • Applying situational leadership for diverse teams • Building effective collaboration practices • Giving and receiving constructive feedback	• Improved collaboration and communication • Adaptive leadership aligned to team readiness • Feedback-driven continuous improvement culture
Masterclass 3 : Managing Business	Managing Business: Building Influence, Trust & Leading Change	• Mapping and prioritizing key stakeholders • Applying the Trust Equation to strengthen credibility and influence • Influencing without authority using reciprocal strategies • Leading and communicating change effectively	• Stronger stakeholder relationships built on trust • Greater influence across functions and hierarchies • Confident leadership through change and transformation

Pre-journey Assessment Questions

Scale (recommended)

1 = Rarely / Not true for me

2 = Occasionally

3 = Often

4 = Almost Always

Section 1: Managing Self – Emotional Intelligence & Motivation

Self-Awareness & Emotional Control

1. I am aware of my emotional triggers at work and their impact on others.
2. I can regulate my emotional responses during pressure situations.
3. I notice how my mood influences my decisions and communication.

Motivation & Self-Leadership

4. I am clear about what personally motivates me at work beyond rewards.
5. I stay focused and productive even when recognition is low.
6. I proactively re-energize myself during prolonged stress or ambiguity.

Open-ended

- Describe a recent situation where your emotions affected your effectiveness as a manager.
- What typically drains your motivation at work?

Section 2: Managing Teams – Collaboration, Adaptability & Feedback

Team Leadership

7. I adapt my leadership style based on individual team member needs.
8. I recognize when my team requires direction vs. autonomy.

Collaboration

9. My team collaborates effectively across functions and roles.
10. I actively address collaboration breakdowns rather than avoiding them.

Feedback

11. I give feedback that is specific, timely, and actionable.
12. I am comfortable receiving feedback without becoming defensive.

Open-ended

- Describe a recent team challenge you struggled to handle effectively.
- Share an example of a feedback conversation that did not go as planned.

Pre-journey Assessment Questions

Scale (recommended)

1 = Rarely / Not true for me

2 = Occasionally

3 = Often

4 = Almost Always

Section 3: Managing Business – Influence, Trust & Change

Stakeholder & Influence

13. I proactively map and prioritize my key stakeholders.

14. I can influence outcomes even when I don't have formal authority.

Trust & Credibility

15. Stakeholders see me as reliable and credible.

16. I balance results with relationship-building effectively.

Change Leadership

17. I communicate change clearly and confidently.

18. I help others deal with resistance during change initiatives.

Open-ended

- Describe a situation where influencing a stakeholder was challenging.
- What aspect of leading change do you find most difficult?

Executive Summary

Pre-journey assessment — Arcesium

ManagEasy TM journey • Self-reported ratings on a 1-4 scale

Overall Cohort Average

3.12/4

Across all 18 items

Managing Self
Average

3.17

Highest: 3.83 • Lowest: 2.17

Managing Teams
Average

3 sections
8 sub-sections

Key Inferences

Please note:
16 of 17 learners responded.
The cohort overall average sits at a score of 3.12/4

Managing Self (3.17) is the strongest section overall.

Self-awareness & emotional control scores slightly higher (3.25) than motivation & self-leadership (3.08), suggesting the group is more attuned to their emotions than they are confident in self-regulating motivation during low-recognition or high-ambiguity periods.

Managing Teams (3.15) shows Feedback as the highest sub-section (3.28), which is a healthy sign — the group is generally comfortable giving and receiving feedback. However, Team Leadership (2.97) is the only sub-section to dip below 3.00, pointing to gaps in adapting leadership style to individual team member needs.

Managing Business (3.06) is the area with the most opportunity.

Stakeholder & Influence scores lowest across the entire assessment (2.84) — influencing without formal authority is clearly a pressure point for this cohort.

Change Leadership (3.22) scores better, suggesting they can communicate change, but struggle more with the relational and influence side.

Qualitatively, themes that emerged consistently: lack of recognition as a core motivation drain, difficulty managing low performers and difficult conversations, and client/stakeholder influence being the toughest business skill.

Section-wise Executive Summary

	Highest	Lowest	Average
Section 1: Manage self	3.83	2.17	3.17
Self-awareness & emotional Control	4.00	2.33	3.25
Motivation & self-leadership	4.00	1.67	3.08
Section 2: Managing Teams	3.67	2.50	3.15
Team Leadership	4.00	2.00	2.97
Collaboration	4.00	2.50	3.19
Feedback	4.00	2.50	3.28
Section 3: Managing business	3.83	2.17	3.06
Stakeholder & influence	3.50	1.50	2.84
Trust & Credibility	4.00	2.00	3.09
Change Leadership	4.00	2.00	3.22

Sub-section averages – cohort View

High=3.50-4.00 Mid = 2.75-3.49 Developing = below 2.75.

Qualitative Insights – Executive Summary

What drains motivation

- Lack of recognition & appreciation (most common)
- Monotony and repetitive work
- Ambiguity in work objectives
- Micromanagement – Lack of autonomy
- Long working hours

Emotional effectiveness challenges

- Managing anger during SLA-crunch situations
- Difficult conversations with low performers
- Handling escalations from clients
- Personal stress spilling into work context
- Conflict between new and existing team members

Team management challenges

- Training & onboarding new team members
- Managing attrition and knowledge gaps
- Work distribution fairness
- Client-side resource & operational constraints
- Conflict resolution within teams

Stakeholder & change challenges

- Influencing without formal authority
- Client buy-in for process changes
- Communicating and sustaining change
- Getting team buy-in and managing resistance
- Complex technical communication to stakeholders

Average scores Question-wise

16 or 17 learners self-rated scale
1 (rarely) to 4 (almost always)

Section 1 – Managing Self

Section 2 – Managing teams

- Section 1 – Managing Self
- Section 2 – Managing teams
- Section 3 – Managing business

Section 3 – Managing business

Scores below 3.00 are flagged indicating the behaviour occurs only occasionally across the cohort and represents a priority development area for this journey.

Key Details – Individual Learner Overview

Manager of learners

Pre-journey Assessment (Learner's Manager)

Scale (recommended)

1 = Rarely demonstrated

2 = Sometimes demonstrated

3 = Consistently demonstrated

4 = Role model level

Section 1: Managing Self

1. Demonstrates emotional control during pressure situations
2. Responds constructively to setbacks and ambiguity
3. Maintains motivation without external push

Open-ended

- Where does this manager struggle most with emotional effectiveness?

Section 2: Managing Teams

4. Adapts leadership style based on team member maturity
5. Encourages open communication and collaboration
6. Gives regular, constructive feedback
7. Handles conflict within the team effectively

Open-ended

- What team-related behaviors should this manager strengthen?

Section 3: Managing Business

8. Builds trust with internal and external stakeholders
9. Influences outcomes beyond formal authority
10. Leads change initiatives with clarity and confidence

Open-ended

- What business leadership capability should this manager focus on?

High - 3

Key Inferences

Please note:
16 of 17 learners responded. The cohort overall average sits at a score of 3.12/4

Change leadership is the sharpest gap. Q10 (Leads change with clarity & confidence) is the lowest manager-rated item at 2.47 — well below "Consistently demonstrated." This is the single most critical development area for the cohort entering this journey.

Conflict handling is a consistent blind spot. Q7 scores 2.64 — the second lowest. Learners rated their feedback capability at 3.29, suggesting comfort giving feedback but discomfort navigating conflict. The journey can address these as related but distinct skills.

Influence without authority needs deliberate focus. Q9 scores 2.73 — managers observe that most learners operate within their formal scope and struggle to extend impact beyond it. Especially relevant for Managing Business growth.

Three learners show a wide self-manager gap (>0.5). E Hemanth Kumar (+1.30), Sudarshan Gupta (+0.92), and Sandeep K Patro (+0.60) rate themselves significantly higher than managers. These are priority candidates for calibration conversations. R Shyam Kumar and Praneeth Rajappa show near-perfect alignment.

Perception Gap in Inference of Managers Report

The overall perception gap stands at **+0.33**, indicating learners rate themselves higher than managers on average; the **highest gap is in Managing Business (+0.35)**, while the **lowest gap is in Managing Teams (+0.32)** — showing relatively consistent overestimation across all areas.

Band key: High = 3.50-4.00 (role-model to consistently demonstrated) · Mid = 2.75-3.49 (demonstrated in familiar situations; building consistency) · Developing = below 2.75 (emerging; needs structured support). High and Low values reflect actual cohort range, not scale limits. Scale: 1 = Rarely demonstrated · 2 = Sometimes demonstrated · 3 = Consistently demonstrated · 4 = Role model level. Paired comparison includes 13 learners where both self-assessment and manager assessment data are available

Qualitative themes – manager observations

Emotional Effectiveness – Struggles

- Client escalations – staying composed under unjustified pressure
- Handling stressful delivery situations without displacement
- Tricky conversations during high-stakes moments
- Connecting with team beyond transactional day-to day work
- Regulating emotions during the learning curve (newer managers)

Team behaviours to strengthen

- Conflict handling – flagged by majority of managers
- Managing and developing low performers consistently
- Providing constructive feedback with specific examples
- Understanding individual team member strengths for delegation
- Being stricter and more decisive when situations require it

Business Leadership Focus Areas

- Stakeholder management and influence – most cited gap
- Leading change end-to-end, not just participating
- Client rapport building and expectation management
- Confidence in independent decision-making
- Taking ownership beyond assigned scope

Strengths & Standouts Noted

- Suleman Khan & R Shyam Kumar – role-model level across all sections
- Abhishek Singh – standout on conflict handling and business influence
- Prasanna C – high self-management despite being new to team
- Sudarshan Gupta – right foundation; ready for role-model level
- Praneeth Rajappa – manager and learner scores aligned; consistent performer
